

Session 3

That's a good question!

Based on the book by J. John

How old is God and when was he born?

Big game: Human knot

Have the group stand in a circle. Instruct everyone to close their eyes and reach their hands forward to the middle of the circle. Everyone needs to find another hand to hold.

Once everyone is holding hands, ask them to open their eyes. Without letting go, the group needs to untangle themselves from this human knot to a circle again.

Memory Verse

Proverbs 2:6

For the Lord gives wisdom; from his mouth come knowledge and understanding

Big Read

The only information that we can trust about God is what he has told us about himself in the bible. And there God clearly tells us that he is "eternal", which means he has never had a beginning and will never have an end.

This is hard for us to understand, but its true. In fact the Bible says that to God a thousand years can be like a day. Time doesn't mean the same thing to God as it does to us.

In the Bible we re: "Before the mountains were born, before you gave birth to the Earth and the world, from the beginning to the end you are God." In other words God is older than the entire universe.

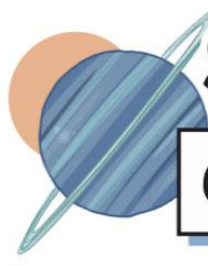

Big Activities

1) 'God is everywhere'

- 2) Planet colouring sheet
- 3) Solar system code breaker

Solar System

Code Breaker

Amazing Fact

The sun is so big that it could fit approximately 1.3 million Earths inside it (if they were squashed up).

Challenge

Crack the codes on the following page using the table below to work out the solar system words.

a	b	c	d	e	f	g	h	i	j	k	l	m
1	2	3	4	5	6	7	8	9	10	11	12	13

n	o	p	q	r	s	t	u	v	w	x	y	z
14	15	16	17	18	19	20	21	22	23	24	25	26

You could also try to find out:

- what the sun would look like from the other planets in our Solar System;
- what the biggest planet is in our Solar System;
- how far away Earth is from the Sun.
